REPORT
OF
Visit to Apiculture Project
Dae 01/03/2018

One day visit was organized under the scheme sanctioned by Board of Student Welfare of Savitribai Phule Pune University to procure introductory information and demonstration of rearing of honey bees to graduate students. Including Science, Arts and Commerce faculty 49 students and 02 staff members were participated in this activity. Dr.T.B. Nikam has established this project and training centre at Govardhan named 'Bee organic farm'. The Bee Organic farm is a combination of honey production unit as well as a place for experimenting and training individuals about the techniques of apiculture. Bee Organic Farm is a place of attraction for all who are interested in beekeeping also is a place to visit for Agro-Tourism. It is an ideal place for study and training of apiculture. This bee farm uses traditional technologies to promote organic farming which makes must visit place for students and teachers.

This Institute also conducts training programs for students as well as people who have different interests in honeybee, such as research and commercial aspects. There are certificate courses that are offered, which are conducted for a short duration of time.

After reaching to the institute, we were first introduced about the different types of honey bees in India their habit and habitat, then we moved to different types of rearing appliance which used in apiculture we have seen Honey extractor, bee box, Hive tool, bee veil. We also saw different types of honey and pollens. The visit was found very valuable for the students
