

M. V. P. Samaj's

Arts, Science and Commerce College, Ozar (Mig)

Program Outcomes

Arts

The faculty of Arts endeavours to give students theoretical and applicable knowledge of various languages and social sciences. We intend to offer understanding of these fields that will enrich students' language skills and deepen their awareness of native, national and global social scenario.

1. The studies of languages (Marathi, Hindi and English) will improve students' communication skills and use of language in various settings. The deeper understanding of languages will enhance their writing skills. The affluence of literature in all the three languages will help them to experience the diverse human behaviour of various backgrounds that can deepen their thought processes. The same skills will give them job opportunities in fields of translation, editing, critics, news, creative writing, anchoring, debating and many more.
2. The leanings in History will accustom them to the rich historical and cultural heritage of our country and strengthen their value system. The knowledge of World History will introduce them to the enormous cultural, historical and social milieu. They can work in archives, do research in history and find proofs for known historical events
3. The study of domestic and international Economics will give them the knowledge of current trends in economic policies, finance, marketing etc. They can develop successful careers in banking, investment, share markets and other financial set ups.
4. The knowledge of Political Science will help students to understand Constitution of India and various political viewpoints. The understanding of Civil rights and duties of citizens of India will support to strengthen their value system and become a responsible citizen. They can become good political analysts.
5. The study of Geography will enable students to comprehend movements on earth and its natural and human complexities. They can make successful careers in Environment Consultancy, Town Planning, Weather Forecasting, Geo-Informatics, Remote Sensing, Cartography, Surveying etc.

6. Participation in sports and physical activities will create interests in various sports. They will be able to understand the importance of sound health and fitness, various health components of fitness, effect of nutrition, rest and lifestyle. They will be identify common health and fitness myths along with trends involved with the evolving nature of physical education
