Department of Chemistry

Soil and Water Analysis

Department of chemistry has began the soil and water analysis in the laboratory. The soil and water samples are collected from the nearby villages of Ozar (Mig). The farmers from different villages have taken the benefit of this facility. In the soil and water testing, various parameters have been analysed and the report for the same is provided to the farmer. The parameters like pH, TDS, electrical conductivity, salinity, etc are measured. Some of the students from second and third year are directly involved in the analysis. They prepare the sample solution and measure the parameters under the guidance of teacher. There is separate soil and water analysis kit for the determination of the parameters.

A handwritten signature in blue ink, appearing to read "H.D.Kale".

Prof. H.D.Kale
Head of the Department
