**Tree plantation and Drip Irrigation 2014-15**

On the college campus for the proper growth of the plants, the college has set drip irrigation system, as per the guidelines provided by the Nisarga Mitra Samiti, for this the dripping system was properly developed so that all the planted trees on the campus should be alive, the system provided water to these even in the summer season, this dripping irrigation system has helped for the rapid growth of the various plants, on the entire college campus is marked with the drip irrigation system. The plants get water for all the twelve month by adoption of this system the flora has been enriched.

**Tree Plantation and Conservation on the Campus 2015-16**

Various species of plants are planted on the college campus, there are some Medicinal, Ornamental plants, Wild plants, Rainy Plants etc. this is to maintain the Plant diversity on the campus and to maintain the balanced environmental conditions, tree plantation is an important activity, along with it comes the duty for conservation of these plants, which has been planted on the campus, for this the college environmental committee has taken the initiative and have given tree to every students to check its growth. This has helped for the conservation of these trees, hence the environment of the campus is conserved.
