 Title: **Analysis of Demerits of Google Translation.**

Introduction: On-line machine translation made its big debut in 1997 with a service called Babel Fish. Users could type in foreign language phrases and get a quick translation in English. In terms of Accuracy, some language perform better than others in Google translate. According to 2016 study, Google translate has 70% accuracy for language like Apkhanaid.

Hypothesis: Google translation is not perfect when paragraphs. It gives benefits of Google translation: it's getting technology in hand machine translation technology is understanding the sea human brain to build knowledge to get smarter over time.

Quick and Easy Translation: Google accuracy never Google translate is a fast and simple way to translate text and websites.

Demerits of Google Translation: (1) Big mistake for your brand: Google translation is not perfect. It's often missing big mistakes in translation. It ignores slang and idioms, misses nuances, ignores word order.

Missed Nuances: Text and number formatting is also tricky for Google translate. Formatting errors and lost content things like your brand's formatting could hurt your business.

Conclusion: This Google translation gives correct translation when it's given for short sentences but when it's given for long sentences or complex sentences, it can't handle it. Reference: https://www.researchgate.net/publication/311111111

 Title: **A Study of English Literature.**

Hypothesis: English literature is a vast field of study that encompasses a wide range of texts and genres. It is a discipline that has evolved over time and is constantly being redefined. The study of English literature is not just about understanding the past, but also about exploring the present and the future. It is a discipline that is both challenging and rewarding, and it is one that is essential for anyone who wants to understand the world around them.

Methodology: The study is conducted through a combination of primary and secondary research. Primary research involves reading and analyzing various literary texts, while secondary research involves consulting academic journals, books, and other sources. The study is conducted in a systematic and organized manner, and the results are presented in a clear and concise manner.
